# Weekly News

## 4 more Vulnerabilities found in Intel processors

- Could be used to leak data that is in CPU buffers
- Leaked data could be used to assist with RCE
- Patches released

<https://thehackernews.com/2019/05/intel-processor-vulnerabilities.html>

## WhatsApp Vulnerability

- Used to propagate spyware on smartphones
- Infects phones by placing a WhatsApp phone call with
- You should probably patch your phone and update WhatsApp if you have it

<https://thehackernews.com/2019/05/hack-whatsapp-vulnerability.html>

## Adobe releases patch for 87 security vulnerabilities; Humanity not surprised

- Adobe Reader and Adobe Acrobat were the most affected
- 42 were arbitrary code execution vulns

<https://thehackernews.com/2019/05/adobe-software-updates.html>

# Pwn Adventure 3

[pwnadventure.com](http://pwnadventure.com)

# To get setup:

1. Go to **pwnadventure.com**
2. Download the client (we will cover the linux client and exploits in later meetings)
3. Get familiar with the game with local play, we will be setting up a server later on the lab infrastructure
